

## Installation instructions

1. After completing payment for the product you will receive two emails: one with product download links and second with product activation code.
2. In the email with product download links – open PDF file, and download relevant installation file (Windows and MAC versions are available).

*Example of PDF file with download links*

3. After downloading installation file, run it on your computer. (In case of Windows version, for some products you will need to extract downloaded **zip** archive and run .exe file). Then skip Windows security warning and follow the installation wizard instructions.
4. Run virtual museum application. On initial registration screen copy serial number (the one that you have received in the email) to the corresponding field in the form.
